

PROTECTING THE ENVIRONMENT IS THE NATURE OF OUR BUSINESS

CRS is committed to preserving the environment as evidenced through every facet of our operation. Our primary line of business is to convert industrial fluids into a reusable product while simultaneously reducing waste disposal. Our on-site business model reduces the risk of material spillage or emission by limiting the transportation of such materials, and we directly support the solar industry whose energy is a renewable resource. At CRS, we continue to seek new and innovative ways to fulfill our role as global stewards in an ongoing effort to protect and serve the communities in which we live and work.

PRESERVING THE HEALTH AND SAFETY OF OUR EMPLOYEES AND OUR CUSTOMERS

CRS is committed to providing a safe and healthy work environment. We will focus on reducing risks through leading and managing our safety process. We actively promote safe work practices, regulatory compliance and employee involvement. Our employees are our greatest asset and they have authority to safeguard themselves and those around them. In addition, our processes are designed to provide our customers with products and services that are safe and reliable.
